Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. *It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited.*

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The prior art of record fail to teach a steering system for an outboard motor mounted on a stern of a boat and including an outboard motor main unit having an internal combustion engine at its upper portion and a propeller with a rudder at its lower portion powered by the engine to propel and steer the boat, comprising, among other limitations, *a vibration attenuator installed at a first connecting portion connecting the outboard motor main unit and attenuating vibration of the outboard motor main unit to be transmitted to the mounting unit by causing the outboard motor main unit to displace relative to the mounting unit; and an actuator rotating the swivel shaft to turn the propeller relative to the boat, the actuator having a main body and an output end to be movable from the main body, one of the main body and the output end of which being connected to the outboard motor main unit at a second connecting portion, while other of the main body and the output end of which being connected to the mounting unit at a third connecting portion.*
